

Music, television, movies. And exercise. Almost forgot exercise.

Free standing or mounted directly, the Cardio Theater® Personal Viewing Screen (PVS) provides a new dimension to the user experience. While others may sell televisions, only the Cardio Theater PVS and its remote control have been designed from the ground up to weather the harsh fitness facility. Each model undergoes rigorous testing which translates into longer product life, reduced downtime and maintenance costs. This means a better return on your investment and a better experience for your users. With state of the art technology, a display almost twice as bright as competing products, and a 150° viewing angle, your users will be glad you opted for the leader in fitness industry entertainment.

Personal Viewing Screen Specifications

TFT LCD Display Features

- High-performance LCD screens made specifically for the fitness facility.
- Built to withstand prolonged equipment vibration, moisture, corrosive cleaning solutions and long hours of daily use.
- Easy setup and programming.
- Brilliant 16.7 million color Liquid Crystal Display.
- Multi-region video support (NTSC/PAL/SECAM).
- Mounts on Precor equipment with integrated mount or on stands for all brands of equipment.
- Available in Black or Silver finish.

PVS Controller Features

- Like the personal viewing screen, the supplied screen controller is built specifically for the tough fitness environment – this means years of reliability and durability.
- Our patented quick-change headphone jack makes replacement easy and reduces downtime and maintenance expense.
- Easy to mount on all brands of fitness equipment.
